1.Schedule your recording in iCal or AlchemyTV DVR

2. Your programme will be saved as a QT file on your drive

3. Convert and Burn it to CD or DVD

Schedule your recordings!

Using its scheduled recording functionality, AlchemyTV DVR can schedule as many recordings as you wish. Time, date, channel, video format, etc... are all fully configurable, giving an extensive control over your recordings. The capture size is fully user selectable, ranging from quarter size to full screen mode, depending on the speed of your processor.

Thanks to its iCal integration, scheduled recordings will be displayed in your calendar. Advanced users can even program their recordings in iCal!

The full QuickTime supports allows you to choose the right video codec for your recordings. If you wish to edit the capture programmes and export them to VCD or DVD, Motion-JPEG is the right choice. Alternatively, the new MPEG-4 format will give you great picture quality and reduced space requirements making it easy to store on your hard drive.

View TV in the Dock!

AlchemyTV DVR can be minimised to be viewed in the Mac OS X Dock. You can even keep watching TV while working in other applications!

Connect any analogue video source!

The composite, S-Video, TV/Antenna connectors allow you to capture from virtually any analogue video source, like a VCR, DVD player, camcorder or straight from your TV aerial of course.
Simply select the connection type you wish to capture from with the Alchemy TV software and press record!
